-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

Art Unit: 2193

1. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

2. Claims 1-3 and 5-47 are rejected under 35 U.S.C. 103(a) as being unpatentable over Huang et al (Applicant's admission Prior Art).

Rejection grounds continue to be those set forth in the previous office action (Paper No. dated 10/22/04, paragraph 6).

3. Claims 1-3 and 5-47 are rejected under 35 U.S.C. 103(a) as being unpatentable over Lynch et al (Applicant's admission Prior Art).

Rejection grounds continue to be those set forth in the previous office action (Paper No. dated 10/22/04, paragraph 7).

4. Applicant's arguments filed on 2/18/05 have been fully considered but they are not persuasive.

Applicant, in his remarks, argues that:

(1). "[r]egarding Claim 1, the Examiner stated that Huang does not specifically disclose the claimed analysis circuit that receives a plurality of operands each of which having encoded status flag information. (See Office Action, page 3, lines 20-22.) In addition, the Examiner merely states that this missing element would be obvious to a person having ordinary skill in the art. (See Office Action, page 4, lines 2-6.) As a result, Applicant respectfully suggests that the Examiner has failed to make a prima facie case of obviousness. In order to make a prima facie case of obviousness, the Examiner must set forth prior art which teaches or suggests every claim limitation" ; and

(2). "[r]egarding Claim 1 , the Examiner stated that Lynch does not specifically disclose the claimed analysis circuit that receives a plurality of operands each of which having encoded status flag information. (See Office Action, page 5, lines 5-7.) In addition, the Examiner merely states that this missing element would be obvious to a person having

ordinary skill in the art. (See Office Action, page 5, lines 10-15.) As a result, Applicant respectfully suggests that the Examiner has failed to make a prima facie case of obviousness. In order to make a prima facie case of obviousness, the Examiner must set forth prior art which teach or suggest every claim limitation" (emphasis added).

With respect to the arguments, the examiner carefully reviews all the applied references and the claimed invention.

First, in the previous office action (Paper No. dated 10/22/04, paragraph 6), it is stated "[h]owever, Huang et al do disclose X and Y operand registers each includes a **special operand indicator** which is stored a special operand of a predetermine set of special operands. Therefore, the Huang et al's feature is equivalent to the claimed '**encoded status flag** information'" (page 3, line 122 to page 4, line 2). The statement does discuss the equivalent function(s) of "missing element". Therefore, the rejection is still proper.

Second, in the previous office action (Paper No. dated 10/22/04, paragraph 7), it is stated "[h]owever, Lynch et al do disclose the equivalent function, e.g., see Abstract, '[b]y appending tag values to each floating point number, the floating point unit can quickly determine which floating point numbers are special floating point numbers and the type of special floating point number'" (page 5, lines 7-10). The statement does discuss the equivalent function(s) of "missing element". Therefore, the rejection is still proper.

5. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
